To SWPPP Checklist users:

This checklist is being provided as an aid to those unfamiliar in the preparation of a SWPPP. It is a comprehensive list of issues a SWPPP preparer must consider during the development of the document. Many sites, especially small construction sites, will not need to address some of the listed items because they are not relevant to the site, the construction activities planned, or the construction materials used. This list allows the preparer to consider the applicability of the item to the specific circumstances of the site, and then determine to what extent the item should be addressed in the SWPPP. The items in the checklist are derived from Sections A, B, and C of the Construction General Permit, and the specific permit section is listed in the second column.

The use of this checklist does not guarantee compliance with the General Construction Storm Water Permit. Additionally, using the checklist to generate a SWPPP is not a substitute for knowledge of the permit requirements, the checklist serves as a **guidance** document only. A site specific SWPPP must be combined with proper and timely installation of the BMPs, thorough and frequent inspections, maintenance, and documentation.
