Volume VI, Number 3

Camarillo Business Watch allows business operators to be notified of crime trends, crime prevention tips, and other services that are offered by the Camarillo Police Department. Similar to the residential program called Crime Watch, **Business Watch** is designed to help businesses - large and small - stay ahead of criminal activity.

Whether your business is in retail sales, restaurant operations, manufacturing, or other fields, you can benefit from the crime prevention information available through **Business Watch**. The program

is free, to sign up please e-mail the Camarillo Crime Prevention Officer, Senior Deputy W. Sean Britt, at william.britt@ventura.org. Please include the name of your business, and an email contact. If you have any questions, please contact Sr. Deputy Britt at 388-5130.

Energy Efficient Equipment...Save Some **GREEN**

Are you taking advantage of any of the Southern California Edison (SCE) energy incentives that are available for businesses? These incentives involve many of the common items used in your business, including lights, computers, and copiers. However, you may also be eligible for savings on things like doors and windows, insulation, refrigeration, water heating, air conditioning, electric motors, and other equipment.

SCE's **Express Solutions** offer companies a way to receive incentives for qualifying energy efficient projects. Incentives are paid on a per-unit basis for lamps, fixtures, horsepower, etc. The information is available at www.sce.com/Express_Solutions.

Another program called **Customized Solutions** is for eligible technologies or solutions implemented on a project-by-project basis, with actual Kw savings. SCE will pay up to 50% of the costs, including labor, materials, and equipment. Details are at www.sce.com/Customized_Solutions.

For more information, please go to www.cee1.org/com/com-lt/RW-lamps-ballasts.xls, or you can contact Nancy Williams at SCE at 654-7226, or Nancy.williams@sce.com.
