Answer the following questions. Attach additional sheet(s) if necessary to include all of your related experience. An attached resume or "see resume" response in lieu of answering any questions below WILL NOT be rated.

1. Describe your experience in designing, building, and maintaining SQL (Structured Query Language) server databases in a working environment. Please list where you received this experience.
2. Describe your experience producing complex reports from financial databases. Please list report writers used and applications the data was obtained from.
3. Describe your experience working with Windows Server 2008 or higher and MS Office products.
4. Describe your experience supporting, and maintaining websites including database integration and e-commerce. Include payment and fee collection, interactive applications, and serving data to the web.

5. Describe your experience working with Geographic Information System applications.
6. Describe your experience in determining specifications, installing, maintaining, and updating, systems and application software on client/server systems to ensure efficient computer resource utilization.
7. Describe your experience monitoring computer systems security and developing contingency recovery procedures.
8. Describe your experience working with ERP (Enterprise Resource Planning) systems. Please list applications you have worked with.
